--------------	---

Features

Control	Control panel with FM radio, MP3, USB & Bluetooth; double speakers
Comfort	Reading light + 7-colour therapy lamp

Delivery & Assembly

Packaging	7–8 cartons per unit, approx. 270 kg gross
Largest cartons	A: 207×176×19 cm (~108 kg) · B: 207×151×19 cm (~59 kg) · C: 165×156×19 cm (~48 kg) · D: 165×50×16 cm (~28 kg); stove, stones and bucket boxed separately
Assembly	Modular panels — approx. 1 hour, 2 people recommended

Care & Maintenance

- Pour water only over the stones, never directly on the stove body; use the wooden bucket and scoop provided.
- Inspect stones annually — re-stack loosely and replace any cracked or crumbling stones.
- Use the drip tray and wipe away excess moisture after each session.
- Sit on a towel during every session; wipe benches and backrests with a damp cloth after use — no harsh or abrasive chemicals.
- Ventilate the cabin after each session (open door and vent window until dry) to let the timber dry out fully.
- Remove marks on interior timber with a light hand-sand using fine-grit paper; clean glass with a non-abrasive glass cleaner.
